

Mississippi ABC Honorable Mention—Healthcare, \$10-25M *Oktibbeha County Hospital, Additions & Renovations*

The Eagle Award for ‘Excellence in Construction’ is an annual chapter award by the Mississippi Associated Builders and Contractors.

White Construction Company’s long-standing history of excellent performance in the healthcare industry helped secure this construction management project.

The impressive county healthcare facility consists of a new four-level concrete frame tower which houses a new emergency room, surgery and radiology area, as well as the renovation of three levels of existing space—endoscopy, respiratory therapy and pharmacy areas. New materials management space, file storage and physical plant offices are situated in new pre-engineered buildings. Also constructed was a new central mechanical plant, separate entrance canopies for walk-in patients and ambulances and additional parking capacity.
